

Limbrick Wood Baptist Church
Health and Safety Risk Assessment:
Coronavirus Risk Assessment

Date of Assessment: 25.06.20

Reviewed: ~~29.06.19 (in light of government guidance).~~

Reviewed: 17.07.20

All areas of risk will be covering infection and infection control. The government have updated and released their guidance on the 29th June 2020, and the changes are reflected in this risk assessment.

The risk assessment comes into effect on the 4th July 2020.

The main symptoms of coronavirus (COVID-19) are:

a high temperature – this means you feel hot to touch on your chest or back (you do not need to measure your temperature)

a new, continuous cough – this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours (if you usually have a cough, it may be worse than usual)

a loss or change to your sense of smell or taste – this means you've noticed you cannot smell or taste anything, or things smell or taste different to normal

Risk	Details
Hazard / Risk	Additional Control Measures
<p>Over-population of church:</p> <ul style="list-style-type: none"> • Increased risk of virus transmission • Reduced capacity to maintain cleaning / hygiene • Breach of government requirements 	<ul style="list-style-type: none"> • From 4 July, gatherings of more than 30 people will be permitted but only in certain public places as set out in law. This will include places of worship and their surrounding premises. However, there may be restrictions to a maximum of 30 for 'life-cycle events' like weddings etc. The government guidance will need to be referred to in these instances. This risk assessment covers 'main church services'. • Government guidance on social distancing will be observed by all; as far as possible this will be 2metre distance from anyone not within your household, or 1 metre plus mitigations (e.g. facemasks), however the church will promote 2 metres as far as reasonably practicable. This may mean that we can only accommodate between 30-40 in the main hall, and thus may need to video / audio link into other rooms, or put in to place additional services to support numbers (morning / afternoon / evening). • Consideration is being given to introducing a 3 phase plan for reopening, to allow for further restrictions to ease but also to allow for the gauging of attendance numbers so that we can best and safely accommodate. • Contact details will need to be provided on each person attending, in case there is a need for them to be contacted as part of the government's 'Track and Trace'. • If anyone is displaying symptoms, then they should not attend and follow the governments guidance on self-isolating etc. • If someone displays / becomes aware that they are experiencing symptoms of coronavirus during their time at church, they should notify a steward and leave the premises and get tested. If the test is recorded as positive, then those who have been in contact with that person at church (being in contact may likely cover that they have been in the same

	<p>environment) will likely be contacted by the 'Test Track and Trace' team and asked to self-isolate. Understandably this will have a significant impact upon the church body, and so it is crucial that all who enter the premises 'check themselves' before attending and don't enter the building but access the streamed service from their own home if they feel that they may be experiencing symptoms.</p> <ul style="list-style-type: none"> • The church will need to undergo a thorough deep clean if someone who has been present at the church develops coronavirus (unless the church is able to be secured for 72 hours, as the virus is no longer present after this time and only 'normal' cleaning is require). • Ventilation should be promoted, ensuring that windows, and wherever possible doors too, are kept open to allow for ventilation and air flow as this reduces the risk of transmission.
<p>Transmission through poor hygiene / cleanliness / proximity</p>	<ul style="list-style-type: none"> • Stewards will be allocated to ensure that before, during and after services that the church building will be cleaned, and specific attention given to 'hot spots' (e.g. door handles, chairs). • Attendees will be required to apply hand sanitiser when they enter the building and be reminded about good hygiene. • Posters will be on display in the church reminding people of their hand hygiene and how to promote this. • Stewards will carry portable sanitisers on their person for their own use but also in case there is an immediate need for another person. • Seating will be laid out to support social distancing with all chairs at 2 metres distancing, however members of the same household can move their chairs closer to each other (this is particularly appropriate when there are children within the household) • The church will operate a strict access and egress system, to try and reduce 'bottlenecks; the main doors into the church hall will be the access, and the doors from the vestibule will be the exit. A steward will be available at both the access and the egress point in order to support the flow and direction of attendees.

	<ul style="list-style-type: none"> • Ideally the use of the toilets would be reduced, in order to reduce risk, however it is understood that the use of these may be necessary for people. Signage on hand hygiene will be present within the toilets, consideration to be given over limiting the number of toilets available (perhaps even limiting to just one). Toilet facilities should be cleaned / disinfected after each use (including the toilet, sink, taps, door handles, etc.) before returning to the church hall using the correct one-way system. • In order to reduce risk of cross-contamination, only those areas that are needed will be available; this should only be the main hall, vestibule, and toilets. The Hardiman Room, backroom, church office and kitchen will be out of bounds for church services. If there is a need to access the kitchen then this will be done by a steward. • After cleaning, materials and PPE will be bagged up and stored for 48 hours before disposing within the normal refuse receptacle.
Fire Risk	<ul style="list-style-type: none"> • If there is a fire or concern of fire, then the immediate risk of threat to life is heightened, and as such all persons should vacate the building via the nearest and safest exit – even if this contravenes the risk assessment around one-way system.
General Church Safety Measures	<ul style="list-style-type: none"> • Hand sanitisers will be present within each room – these will be checked by stewards before and after each ‘session’ • Disposable hand towels will be used in replacement of washable towels (this is the same for the kitchen too) • Stewards will be available to direct and guide.
The Role of the Steward	<ul style="list-style-type: none"> • The role of the steward is to ensure that the risk assessment is supported in practise. • A steward should remain on each access and egress point, if a steward needs to leave their position then a replacement steward should take their position before they leave.

	<ul style="list-style-type: none"> • There may be occasion where someone may need to enter through the egress point, and as such the stewards should support this and ensure that the flow of people stops whilst this occurs. • The stewards should ensure that people use the hand sanitisers upon their entry to the premises. • The stewards should encourage social distancing, as sometimes people will need reminding of this, particularly when they have not seen each other for a sometime.
Kitchen	<ul style="list-style-type: none"> • Only those permitted to be in the kitchen should be in there – this will be stewards on service days • The kitchen should be used by the fewest people necessary, and all areas cleaned after use. • Any items used should be washed on a hot wash (minimum of 70 degrees) in the dishwasher to kill any germs.
GDPR	<ul style="list-style-type: none"> • Attendance sheets will be in place for each event. This information will be stored by the secretary of the church, securely held at church. The information stored will be destroyed after 21 days as the information will be redundant. Each service will require a sign in sheet with contact details of each person that attended (including children, although contact details given can be that of the appropriate adult accompanying them). • Those that are known to the church as regular attenders will already have their contact details registered and so only their name will be recorded, however those new / not known will have their name and phone number recorded.
Gatherings of 6 people or 2 households	<ul style="list-style-type: none"> • The organiser will be responsible for ensuring that only the needed areas are used, and by the fewest amount of people as necessary. Please see the other sections to cover cleaning, social distancing etc
Communion	<ul style="list-style-type: none"> • The bread and wine should be covered and not left exposed. • The bread should be pre-cut, and not 'broken by hand', however, the pastor can still do this with a separate piece that he himself can consume but not distribute.

	<ul style="list-style-type: none"> • The wine is held in individual receptacles, and thus participants can take their own, paying attention not to touch any of the other glasses or this can be directly handed to them by the server who will have sanitised their hands prior to undertaking this / worn gloves. • Care should be given with the bread and the wine for no physical contact to occur between the server and the receiver, and if this does occur then sanitisation should take place immediately.
<p style="text-align: center;">Singing</p>	<ul style="list-style-type: none"> • Government guidance is that ‘People should avoid singing, shouting, raising voices and/or playing music at a volume that makes normal conversation difficult or that may encourage shouting. This is because of the potential for increased risk of transmission from aerosol and droplets.’ In the governments updated (last updated 15th July 2020) guidance they have now said, ‘There should be no group singing inside places of worship when worshippers are present.’ • Therefore, spoken responses during worship should also not be in a raised voice. • Currently there is no law against singing, but government advise is that this should not occur. As such, this will be risk assessed. Options for this are: <ul style="list-style-type: none"> -Those wishing to sing sit at the front of church (thus avoiding those not wishing to sing who would sit away from them) -Social distancing to be increased to at least 3 metres as a form of mitigation. -Those singing should sit and not stand to reduce the potential projectile -Consideration could also be in place for those singing to use face masks -The level of singing / type of song should be considered too, a ‘softer and gentler’ worship song requires less expulsion from the lungs, thus reducing the risk of transmission. -Any singing, at the present time, that is to occur during the main service, should be done at a conversational level, more as a reflective expression of worship • It should be noted and reiterated that despite having these mitigations the risk for singing remain significantly higher than if there was not singing, but that these factors would make a level of reduction of risk. There has been a

	recognition that the aerosol nature of the virus is far greater than initially understood, and thus it is strongly recommended that this does not occur in its 'usual' form.
Other Events	<ul style="list-style-type: none"> Any events organised by the church (other than main church services) will require an addition to this risk assessment so that it can be completely risk assessed – notification for this will need 5 days minimum so that it can be done thoroughly. E.g. something informal can react from this current risk assessment, however if the church wishes to hold a formal event that is not covered within this assessment then this requires a new assessment.
Tithes and Offerings	<ul style="list-style-type: none"> Where possible attendees should try and avoid giving cash donations and continue to use online giving. Where this is not an option, cash should be collected in a receptacle that is set in one place and handled by one individual, as opposed to being passed around. Regular cleaning and hygiene should be maintained, and gloves worn to handle cash offerings where giving continues.
Children and young people	<ul style="list-style-type: none"> Due to the nature of risk of infection, all items for children's play will not be available for use At the current time, there will be no sessions in place for children's clubs (this will regularly be reviewed). Parents and care givers are to ensure that supervision is given to their young people (including if they go to the bathroom, to ensure that appropriate hygiene is undertaken).

Additional Notes:

This risk assessment should be made available to everyone attending the church
In addition to this a short guide of the main points for attendees will be provided
